HEALTH UPDATE: H1N1

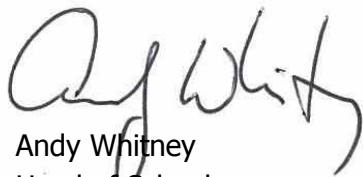

Dear Parents,

I write to inform you that a child in Van Gogh Class (K-1) has tested positive for the 2009 H1N1 flu virus.

The child's symptoms began on Tuesday, November 10, evening with a runny nose and mild fever. He has been kept out of school since then.

The child tested positive for the virus today. He will return to school once he gains approval from his physician. For your information, the infected student is not an ECLC bus rider.

Thank you for your cooperation and understanding,

Andy Whitney
Head of School
